**Invitation for Members only:
Register with Learning Link Scotland's Website**

Dear David

As one of the benefits offered to Learning Link Scotland members we are developing the "members only" section of the website.

We have started to upload content, which will be available to you when you [register with us online](#).

For example, today I put up [the latest Membership Report](#) (requires registration to view), which collates and analyses all the data we collect from the membership. This will give you an insight into the number of learners reached, the range of services and delivery methods that members offer, as well as information on things like the geographic reach of the membership

We use this report to create a picture of the membership which informs much of the work we undertake. Up to date information is crucial in raising the sector's profile and demonstrating its value.

We hope you find it useful. Soon, **you will receive by post a member data form** asking you to update the details that we hold on our membership database. The more up to date information we have, the more accurate and effective the profile of the membership will be.

The benefit of registering for the website is to have exclusive access to the digital version of **Explaining the Difference, our evaluation toolkit**, as well as the Ask the Community page, the Policy Briefings, Consultations, and Reports pages.

Anyone can register with the website, however only members of Learning Link Scotland will be eligible for access to the restricted pages of the site.

Registering for the website is easy, there is just a simple form to fill out ([click here](#)).

Once you have registered we will contact you via email to confirm your account.
